

# RITCHIE-SMITH Harmony

## High Fibre Pellets

### IDEAL FOR

- Horses travelling often
- Horses with metabolic challenges
- Horses who are easy keepers
- Adding consistency to the forage portion of diets

### LOW SUGAR, LOW STARCH (LOW NSC)

This high fibre, gut health focused pellet was designed to support horses who are sensitive to sugar and starch. Premium timothy and soyhulls were carefully selected to create the base of this low sugar + starch pellet. This feed assists with weight maintenance, stable energy levels and a shiny healthy coat. It is an excellent choice for gut sensitive horses because of its high level of soluble fiber and inclusion of amino acids specifically chosen to support gut tissue maintenance and repair. In addition, it contains functional levels of nutrients needed to support hoof growth, as well as the immune and nervous systems.

## KEY FEATURES

### Hooves and Skin

- Biotin
- Essential Amino Acids: Lysine, Methionine and Threonine
- Collagen building Amino Acids: Glycine and Proline
- Chelated minerals: Zinc, Copper and Manganese
- No added iron

### Immune Support

- 2000 IU of Vitamin E (1000 IU from Natural Vitamin E)
- Omega-3 from flax oil
- Organic Selenium
- Vitamins A & D

### Gut Health

- Yeast culture (pre & postbiotics)
- Fermentable fibre sources
- Amino Acid for healthy gut tissue: Glutamine

### Metabolism

- Iodine naturally sourced from kelp
- B-Vitamins: Riboflavin, Thiamine, Folic Acid, Niacin and B<sub>12</sub>

## FEEDING RECOMMENDATIONS

- Feed changes should be made over a period of 7-10 days.
- Harmony High Fibre Pellets should be split into at least two feedings per day to assist with optimal digestive health. See table below for appropriate feeding rates.
- Please accurately determine how much to feed. A kitchen scale is an excellent tool for any feed room.
- If the recommended feed rates are not suitable for your horse (ie: unwanted weight changes), please contact us to discuss your horse's individual needs.
- DO NOT EXCEED recommended feeding rates.
- Provide clean water and a salt source at all times. DO NOT provide additional trace minerals containing copper, zinc and/or selenium.
- Adequate forage supply provides the base of a healthy diet. If free choice hay is unavailable, ensure a minimum of 1.5% of the horse's bodyweight as hay or equivalent pasture is provided daily.

\*\*Harmony High Fibre Pellets are perfectly complemented by our Complete Supplement Pellets. If your horse does not need a full dose of High Fibre Pellets daily, we can help you determine the right amount of High Fibre Pellets and Complete Supplement Pellets in order to balance your horse's daily ration. Please don't hesitate to contact us!

## High Fibre Pellets

IDEAL FOR HORSES IN THEIR ADVANCED YEARS

NUTRIENT SPECIFICATIONS	PER 2.5 KG (500 KG BW)
