### What's New?

#### Increased Protein

- Aids in muscle development
- Supports body condition

#### Double the Lysine

- Additional protein building blocks
- Supports topline development

#### Increased Fibre

- Supports hind gut health
- Promotes energy from fibre

#### Improved Energy

- Increased crude fat
- Moderate NSC level
- Provides energy through all phases of work

#### DAILY RATES

Bodyweight (lbs)	Bodyweight (kg)	Feed Rate (kg)
600	272	1.4
800	363	1.8
1000	454	2.3
1100	500	2.5
1200	544	2.7
1500	681	3.4

Adequate forage supply provides the base of a healthy diet. If free choice hay is unavailable, ensure a minimum of 1.5% of the horse's bodyweight as hay or equivalent pasture is provided daily.

#### GUARANTEED ANALYSIS

Crude Protein .....	15 %
Crude Fibre .....	13 %
Crude Fat .....	6 %
